

GUIDOLIN *Stampi*

Design and manufacture dies,
production of
high precision metal parts

Company

Thanks to its 40 years of experience, Guidolin Stampi designs and manufactures progressive dies for the blanking and deformation of metal sheets.

We have been supplying the automotive, electrical, electronics, illumination and other sectors with high precision metal parts. Guidolin Stampi thanks to a qualified personnel offers to its customers an extensive know-how in the sector.

**40 years of
experience**

**Extreme
precision**

**Flexible production
capacities**

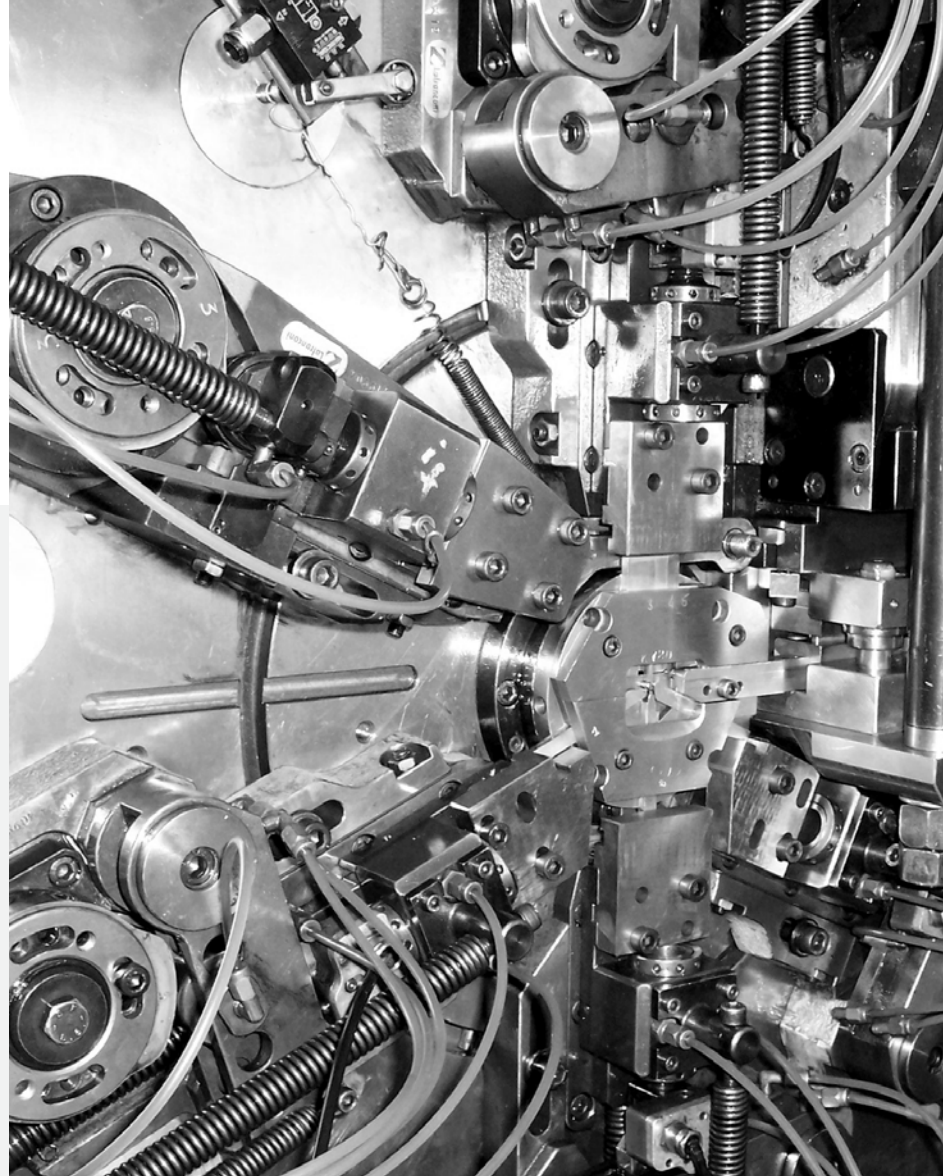

**Competitive
production costs**

**Strict adherence
to deadlines**

**Individual
advice**

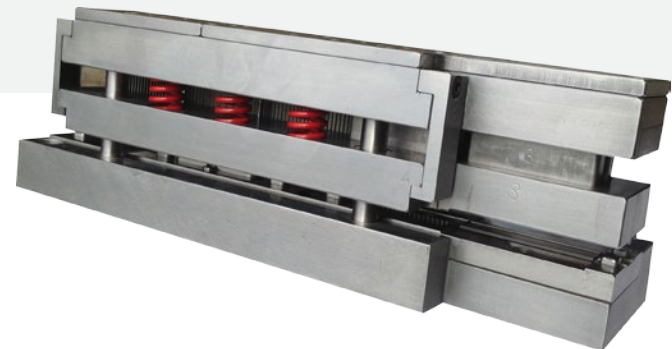

Tooling centre

All tools, are produced by experienced and skilled staff in our own tooling centre.

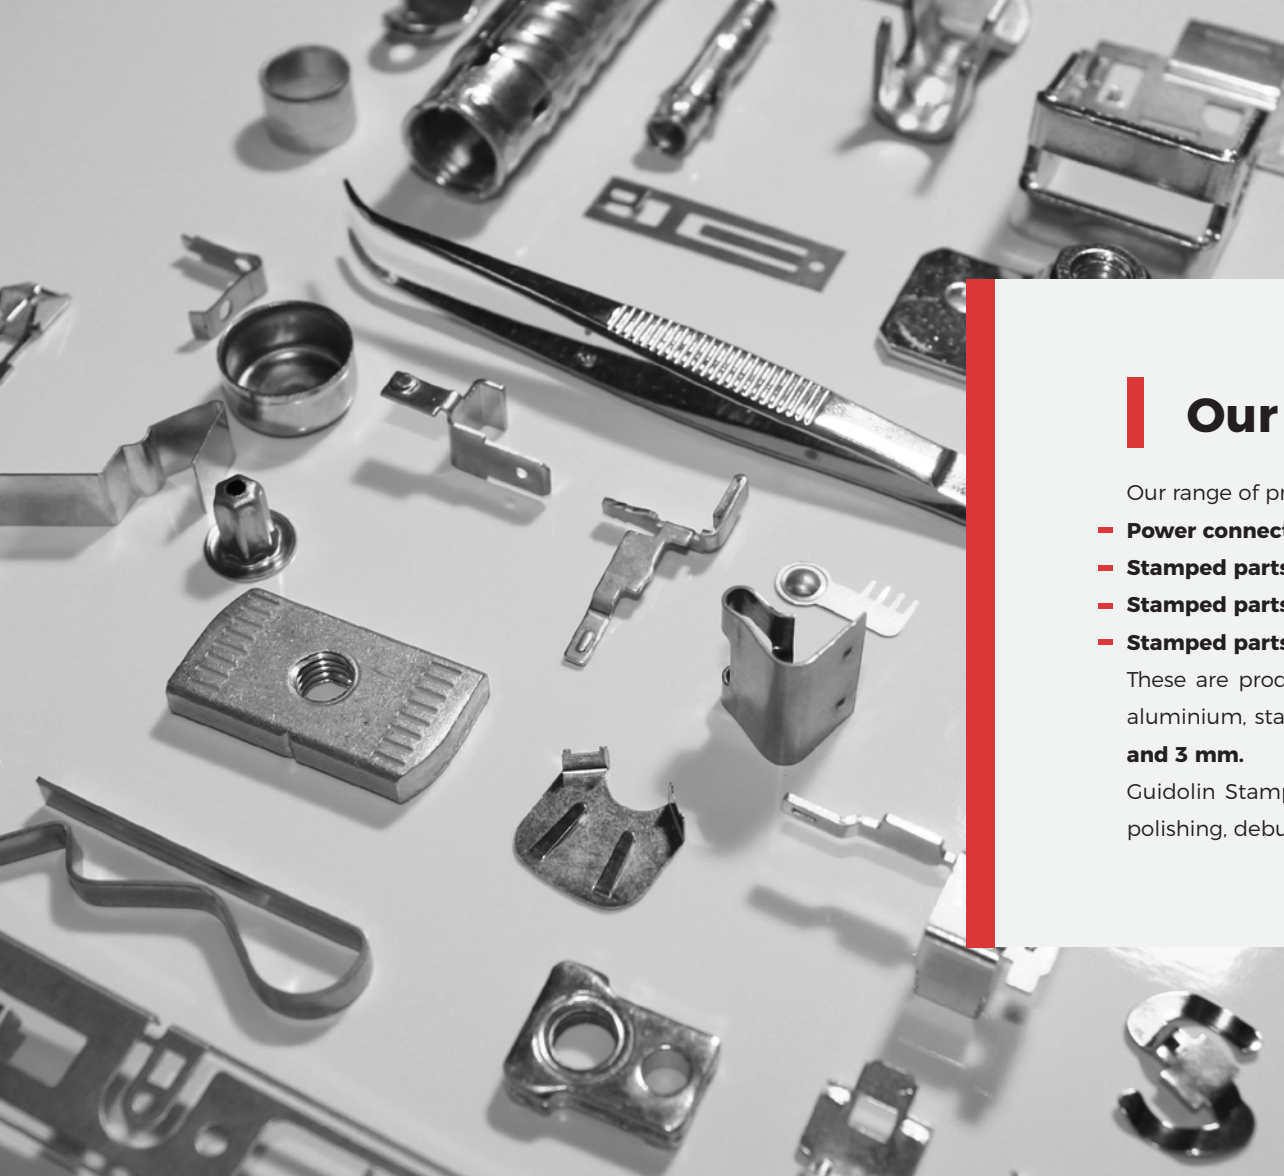

We manufacture stamping, bending and assembly tools for small to large scale production components. We make sample tools for your pre-production series.

Production

The production of stamped parts is carried out by mechanical presses (18 to 200 tons) hydraulic driven presses and stamping – bending presses.

Our products

Our range of products includes:

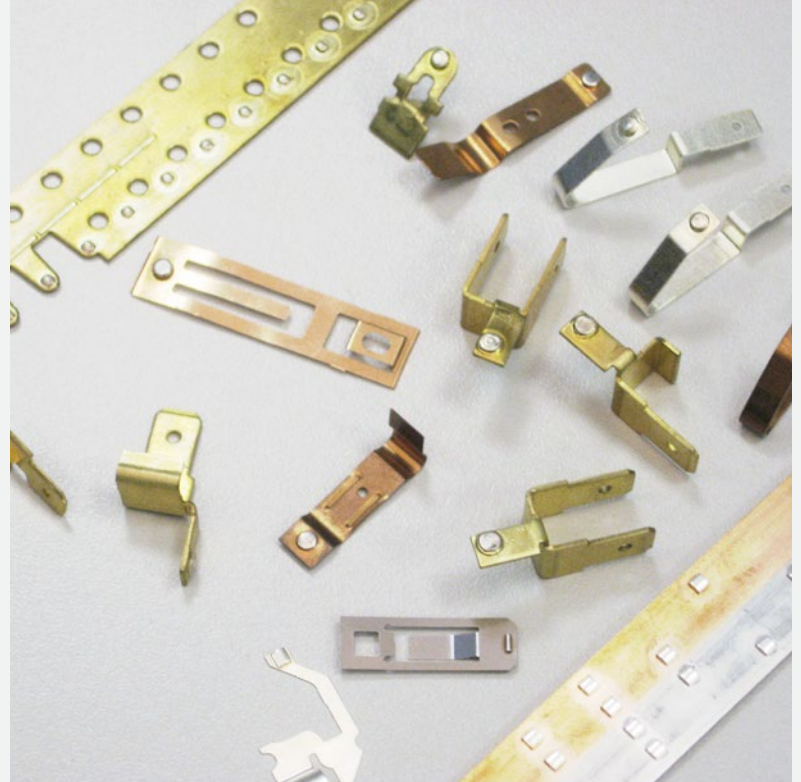

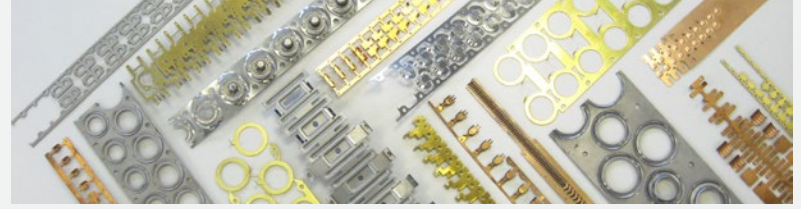

- **Power connections, wire terminals, brackets, shell for wall plug**
- **Stamped parts with electro-welded contacts in silver and its alloys**
- **Stamped parts with formed threads**
- **Stamped parts in wire**

These are produced with different materials such as copper, bronze, aluminium, stainless steel, iron, bimetal with a thickness between **0,1 and 3 mm**.

Guidolin Stampi offers a comprehensive customer services, cleaning, polishing, deburring, heat and surface treatments..

| Metal Parts

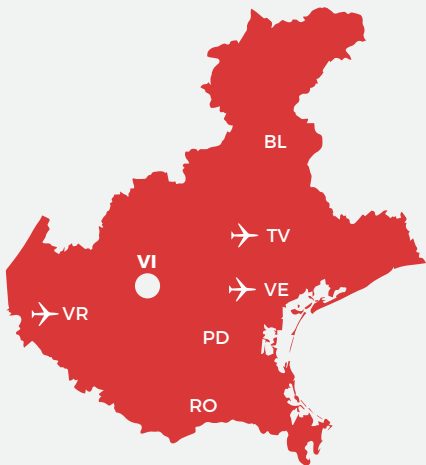

Quality

Quality management is effected in accordance with **DIN EN ISO 9001** specifications.

The metrologic room is equipped with an extremely modern measuring instruments.

The quality service is able to supply for each production or pre-series a certificate with our dimensional report.
